

Telescopic, Variable Flow Control Foundation and Crawl Space Vents

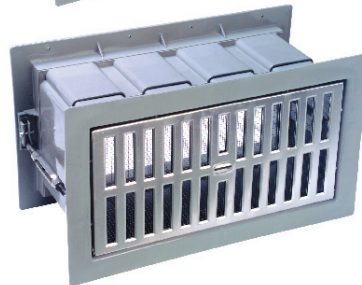

Innovative vents feature solid steel turnbuckle that adjusts to fit almost any size wall.

Welcome to the future of foundation ventilation – and possibly the last vent you’ll ever need. Vortex™ – the first variable flow, telescopic vent that comes in two sizes and expands from 4.75 to 7 inches to fit 5, 6 and 7 inch walls and from 7.5 to 10 inches to fit 8, 9 and 10 inch walls. Plus, Vortex variable flow control means you choose between three models – thin manual, manual or automatic louvers.

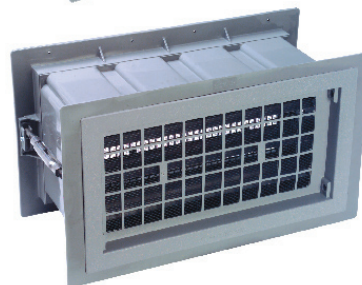

- Adjustable and telescopic for maximum versatility
- Less SKU/inventory headaches – two sizes fit all
- High-density polyethylene construction
- Three models: thin manual, manual or automatic self-adjusting louvers
- A model to fit every budget
