## SECTION 4) FIRST-AID MEASURES

---

### Inhalation

Remove source of exposure or move person to fresh air and keep comfortable for breathing.

If experiencing respiratory symptoms: Call a POISON CENTER/doctor.

If breathing is difficult, trained personnel should administer emergency oxygen if advised to do so by the POISON CENTER/doctor.

### Eye Contact

If irritation occurs, cautiously rinse eyes with lukewarm, gently flowing water for 5 minutes, while holding the eyelids open.

If eye irritation persists: Get medical advice/attention.

### Skin Contact

Take off contaminated clothing, shoes and leather goods (e.g. watchbands, belts).

Wash with plenty of lukewarm, gently flowing water for a duration of 15-20 minutes or until medical aid is available.

If skin irritation occurs: Get medical advice/attention.

### Ingestion

Rinse mouth.

If you feel unwell/If concerned: Get medical advice/attention.

### **Most Important Symptoms and Effects, Both Acute and Delayed**

No data available.

### **Indication of Any Immediate Medical Attention and Special Treatment Needed**

If ingested, seek immediate medical attention and have product container or label at hand.

---

## **SECTION 5) FIRE-FIGHTING MEASURES**

---

### **Suitable Extinguishing Media**

Carbon dioxide can displace oxygen. Use caution when applying carbon dioxide in confined spaces. Large Fire : Water spray, fog or alcohol-resistant foam.

Small Fire : Dry chemical, foam, carbon dioxide, water-spray or alcohol-resistant foam.

### **Unsuitable Extinguishing Media**

Do not use straight stream of water.

### **Specific Hazards in Case of Fire**

No data available.

### **Fire-fighting Procedures**

Isolate immediate hazard area and keep unauthorized personnel out. Move undamaged containers from immediate hazard area if it can be done safely. Cool containers with flooding quantities of water until well after fire is out. Caution should be exercised when using water or foam as frothing may occur, especially if sprayed into containers of hot, burning liquid.

Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

### **Special Protective Actions**

No data available.

---

## **SECTION 6) ACCIDENTAL RELEASE MEASURES**

---

### **Emergency Procedure**

ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Isolate hazard area and keep unauthorized personnel away. Stay upwind, uphill and/or upstream. Ventilate closed spaces before entering. Do not touch or walk through spilled material.

### **Recommended Equipment**

No data available.

### **Personal Precautions**

Avoid breathing vapor. Do not touch damaged containers or spilled materials unless wearing appropriate protective clothing.

### **Environmental Precautions**

Stop spill/release if it can be done safely. Prevent spilled material from entering sewers, storm drains, other unauthorized drainage systems and natural waterways by using sand, earth, or other appropriate barriers.

### **Methods and Materials for Containment and Cleaning up**

No data available.

---

## **SECTION 7) HANDLING AND STORAGE**

---

### **General**

Wash hands after use. Do not get in eyes, on skin or on clothing. Eating, drinking and smoking in work areas is prohibited.

### **Ventilation Requirements**

Use only with adequate ventilation to control air contaminants to their exposure limits. The use of local ventilation is recommended to

control emissions near the source.

### Storage Room Requirements

Store in cool, dry, well-ventilated areas away from heat, direct sunlight, and any incompatibilities. Protect from freezing. Store in approved containers and protect against physical damage. Indoor storage should meet OSHA standards and appropriate fire codes.

---

## SECTION 8) EXPOSURE CONTROLS/PERSONAL PROTECTION

---

### Eye protection

Wear eye protection with side shields or goggles. Wear indirect-vent, impact and splash resistant goggles when working with liquids. If additional protection is needed for entire face, use in combination with a face shield.

### Skin Protection

Use of gloves approved to relevant standards made from the following materials may provide suitable chemical protection: PVC, neoprene or nitrile rubber gloves. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, glove thickness, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. Launder soiled clothes or properly disposed of contaminated material, which cannot be decontaminated.

### Respiratory Protection

If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker, a respiratory protection program that meets or is equivalent to OSHA 29 CFR 1910.134 and ANSI Z88.2 should be followed. Check with respiratory protective equipment suppliers.

### Appropriate Engineering Controls

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value.

None of the chemicals in Section 3 are regulated under "OSHA\_Tables\_Z1\_Z2\_Z3", "OSHA\_Carcinogen - OSHA Carcinogen", "OSHA\_tppm", "OSHA\_tmg", "OSHA\_sppm", "OSHA\_smg", "ACGIH\_tppm", "ACGIH\_tmg", "ACGIH\_sppm", "ACGIH\_smg", "nioshtppm", "nioshtmg", "nioshsppm", "nioshsmg", "ACGIH\_carcinogen", "NIOSH\_carcinogen", "ACGIH\_TLV\_Basis", "ACGIH\_Notations", "OSHA\_SkinDesignation"
